

PEPFAR

U.S. President's Emergency Plan for AIDS Relief

Namibia

COP 2018 Stakeholder Meeting

January 31, 2018

PEPFAR

Orphans and Vulnerable Children (OVC)

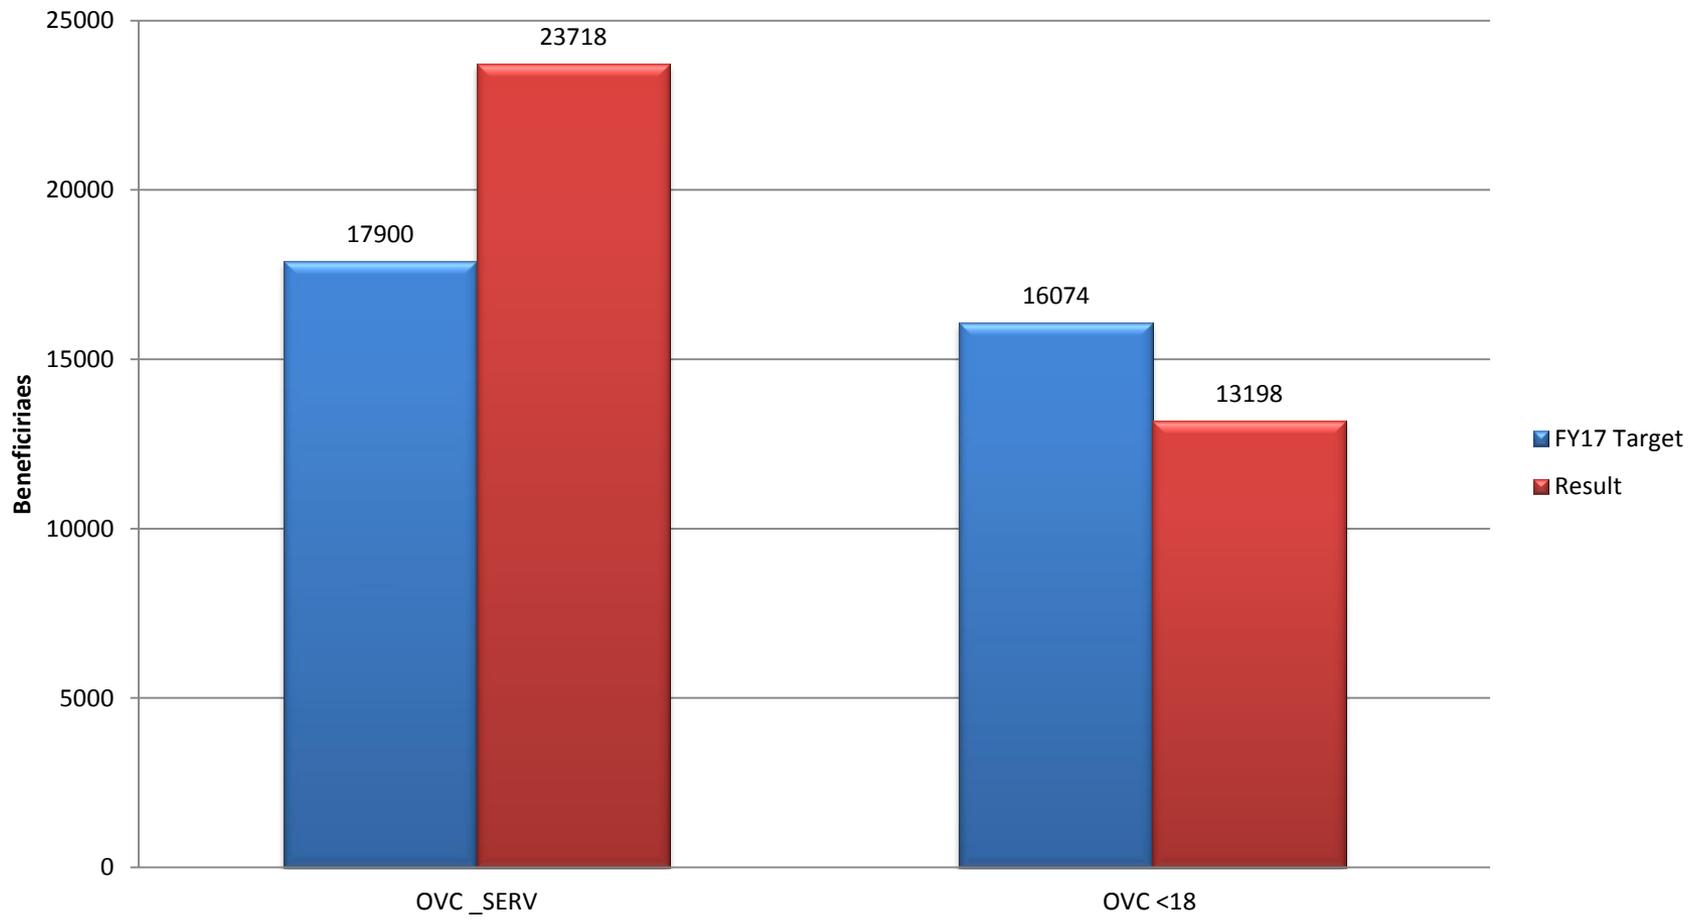

PEPFAR

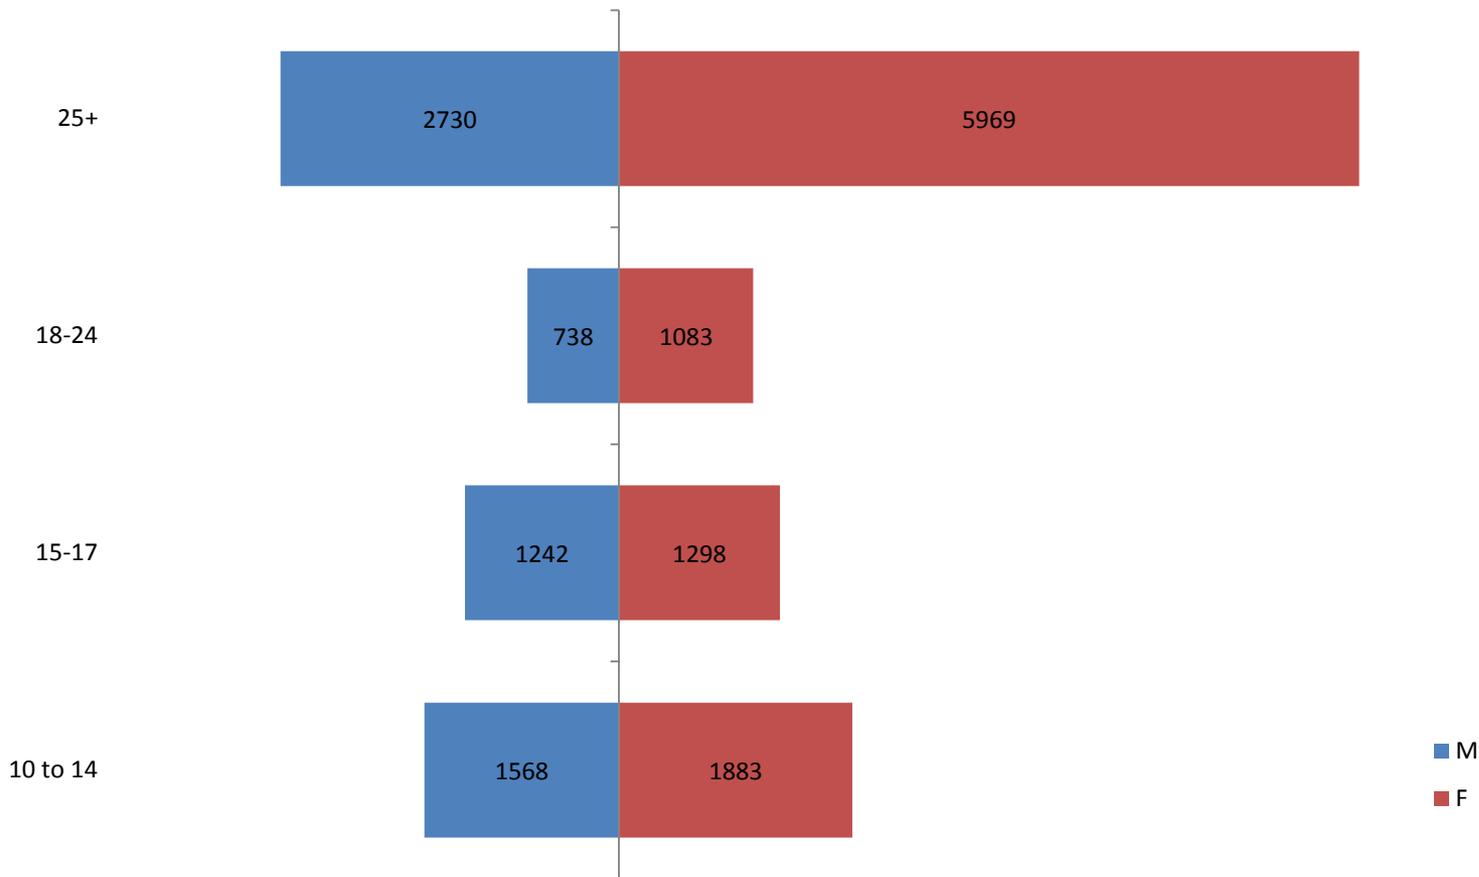

Annual Performance Result: FY17

Achievement

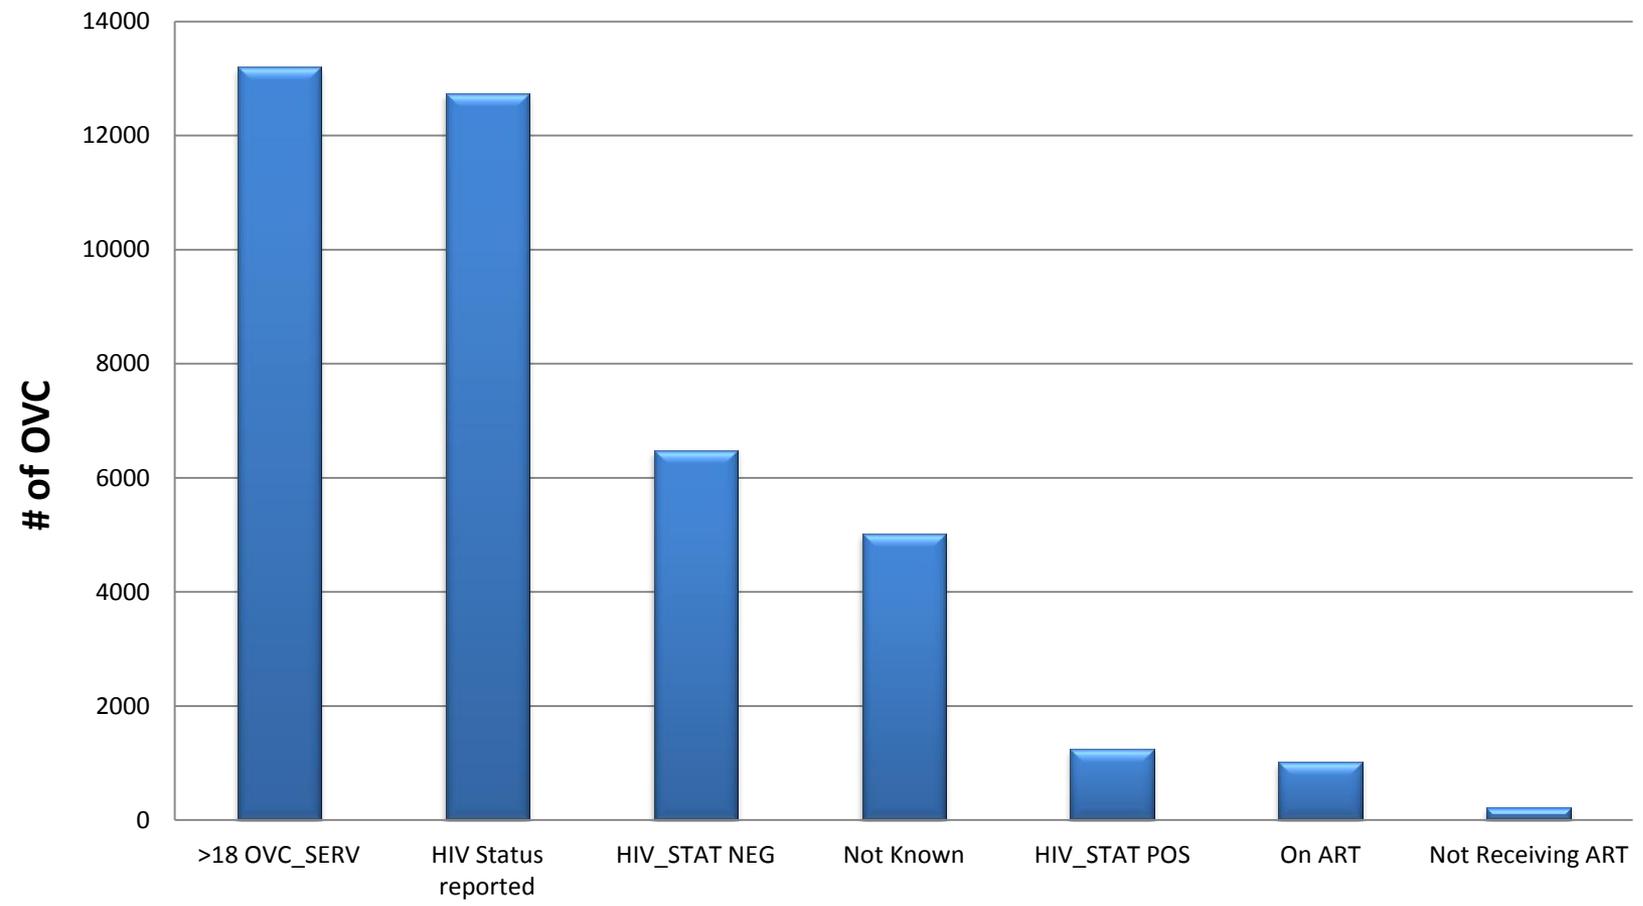

Results by Age & Sex: APR17

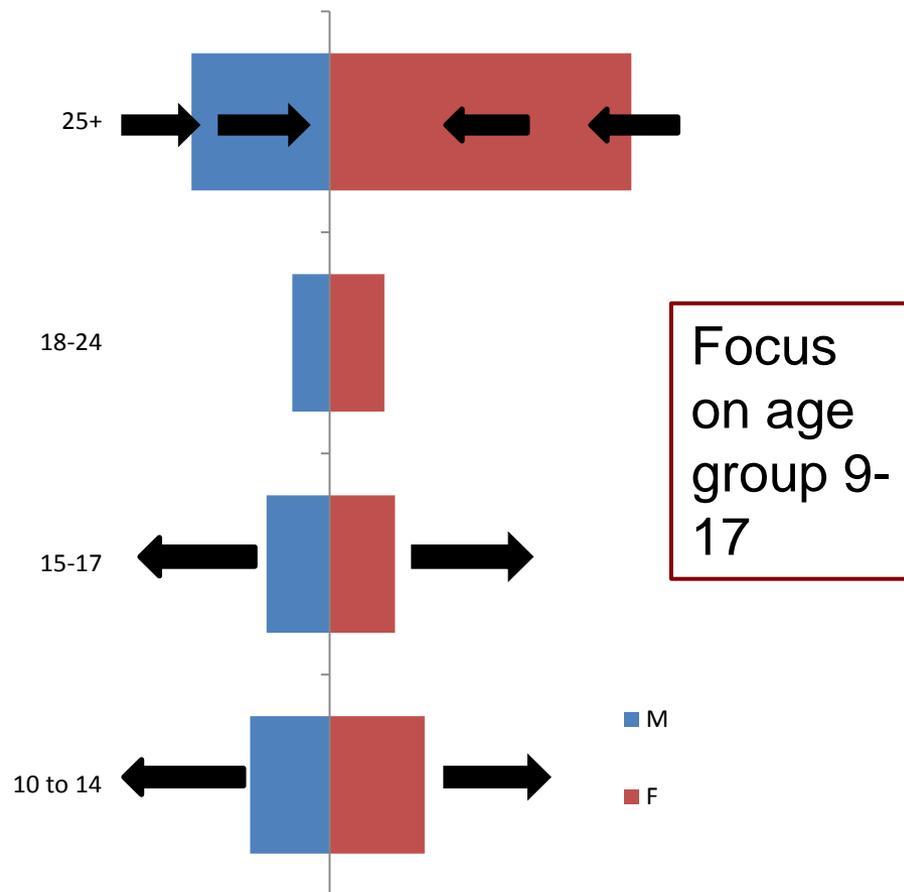

OVC (>18) Clinical Cascade: APR17

Challenges and Potential Implications

- 100% of >18 with known HIV status
 - 38% reported unknown HIV status in COP17
 - Risk assessment
- Program not adequately reaching age group 9-17
 - Only reached 55% of under 18
- Identifying adolescents and youth at risk
- Consent for HIV testing for children

PEPFAR

COP 18 Planning

- Linkage and referral to facility and community-based services like HTS, prevention, pediatric care, treatment, gender based violence
- Case management and monitoring toward OVC outcomes
- Emphasis on children 9-17 in alignment with current demographic trends.
- Comprehensive family-based support for OVC aged 0-17

COP 18 Planning

- Focus on sub-priority populations e.g. children of female sex workers, children who have experienced violence.
- Provide non-bio-medical interventions that reduce the risk of HIV for children, mitigate the impact of HIV on children
- Focus on pre-adolescent and adolescent girls at elevated risk of violence and HIV infection
- Coordination with DREAMS

Drought Mitigation Activities, FY17/18

- Procured 49 MT of therapeutic and supplementary food (TSF)
(in addition to 300 MT procured by Global Fund)
- Integrated TSF into the central supply chain system
- 107,792 individuals supported by household level WASH activities
- 5,090 people reached with hygiene promotion messages
- 1,155 households received counseling on water safety and hygiene
- 129,748 individuals nutritionally assessed via MUAC
(Q2: 2,599 Q3: 37,734 Q4: 47,782 Q1: 41,633)
